## Families and Community

Positive results were reflected in the Parent survey during the first quarter of the year. We saw that the overall campus experience was meeting parents' needs. We have also seen an increase in enrollment from the 2018-2019 school year to the 2019-2020 school year. Parents are more likely to refer others to our school as they have found this to be a positive environment.

## Demographics Strengths

### Students

Compass Rose has seen exponential increases in student population year after year. Though the network serves predominately Hispanic students, there have been incremental increases in both the African American and white student groups. The secondary program at Legacy has strong enrollment and approximately 80% student retention.

### Staff

Compass Rose's staff demographics indicate more racial diversity than the 2010 San Antonio and US Census. There has also been growth in the range of teaching experience. The network pays its teachers \$6,000 or more than the state average. Though teachers were relatively inexperienced in Year 1, the academic results in 2018-2019 was a testament to the ability of leadership to find high-potential talent, develop that talent rapidly, and achieve positive student results. Additionally, the district's commitment to hiring minority staff members shown through with 19.3 or 80.5% of all Compass Rose staff self-identifying as either African-American, Hispanic, or Asian beating the state average by 30.1%.

## District Processes & Programs

### District Processes & Programs Summary

Compass Rose strives to be a world-class academic institution, employer, and steward of public money and trust. To that end, the network has implemented multiple systems across departments to better support the long-range and day-to-day plans. Academically, Compass Rose adopted high-quality instructional materials that are aligned to the Texas Essential Knowledge and Skills (TEKS). Our goal is to ensure that all content areas, especially core subjects have and follow curriculum guides and scope and sequences throughout the year. These guides include unit plans and resources for teachers as they create their weekly lesson plans. Job-embedded professional development expanded from 2019-2020 to the new school year. The network adopted a robust appraisal software that facilitates course development, portfolio building, and professional goal-setting. All staff members are evaluated based on the True North Framework for their role. Professional development focuses on systems development, classroom management, teaching Depth of Knowledge, data-driven instruction, classroom culture, and checking for understanding. Quarterly interim assessments are network-provided and managed, as well as aligned to the local and state curriculum. Through data days planned each quarter, teachers and instructional coaches work together to develop reteach plans and action items based on students' needs. All instructional staff have access to a comprehensive student data software system that aids in data analysis, data collection (online testing), and targeted instructional support.

The three main priorities in the Talent department are:

- Build healthy applicant pools by having at least 3 "high-quality" applicants for every projected Campus Leader and Teacher vacancy.
- Build strategic partnerships with HBCUs and associations that support diverse talent sourcing and recruitment.
- Enhance our employee referral program to make-up the largest % of our hiring source.

To evaluate the network's effectiveness in cultivating a strong organizational culture, Compass Rose participates in the Great Places to Work assessment program. This partnership will allow the organization to use a proven methodology to assess workplace culture. All team members are invited to take the survey and responses are completely anonymous.

### District Processes & Programs Strengths

Curriculum, Instruction, and Assessment are aligned within the network and have a strong foundation upon which campuses can build their instructional models. Systems are in place for sourcing resources, disseminating exams, professional development, and analyzing data. Team Members at Compass Rose drive their development in collaboration with their manager and/or coach. While growth and development happen daily through on the spot feedback, observations, and check-ins, there are three key formal conversations that make up our True North Development Cycle. The appraisal and coaching processes allow for personalization, as well as standardization so that team members believe in the methods used to evaluate their performance and develop their strengths. Adopting specific communications processes

continues to support the network's push for streamlined dissemination of key information to various stakeholders.
